The Classic Pictures Of All Time

The 90's are full of movie actors, good and bad, from muscle-bound former athletes to Oscar winners. But, what ever happened to movie stars... the greats like Bogie, Spencer Tracy, Cary Grant, James Cagney, Katharine Hepburn and Jimmy Stewart? What happened to the glamorous star whose every movement was followed by millions of Americans in Movietone News and Photoplay magazine?

They may not be appearing at your local movie theater any more, but they are around, and you don't even have to leave home to see them! Just tune in channel 43...

The folks at American Movie Classics love good movies as much as you do. Their movies reflect the qualities we all admire — the courage of Errol Flynn, the

down to earth charm of Fred Astaire, the innocence of Audrey Hepburn, the quiet strength of James Stewart, the simple honesty of Gary Cooper, the dependability of Maureen O'Hara and the wit of Groucho Marx.

7 days a week, 24 hours a day, American Movie Classics brings you these real-life qualities, found in the greatest and most enduring stars that ever lived. They're featured in Hollywood's greatest movies from the 30's to the 70's, all uncut and commercial-free... and untouched by computerized colorization. Classic movies as they were meant to be seen!

Whether you enjoy comedies, dramas, love stories or westerns, American Movie Classics brings back the feeling like no one else can!

The Outer Banks CABLEVISION Connector

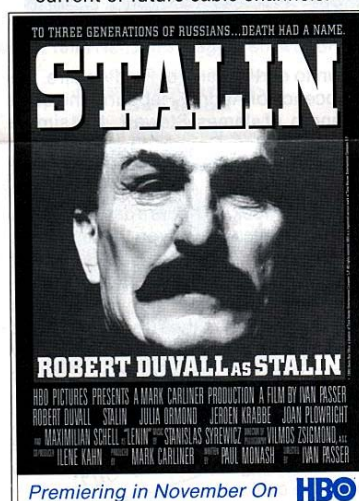

GO AHEAD...ASK US!

If you have any questions concerning your cable service, please call or write. We'll do our best to answer any questions you may have!

Q. I'm buying a new TV. What does "cable ready" mean?

A. The term "cable ready" isn't exactly accurate. A cable-ready TV or VCR can only receive Cable TV signals that are *not scrambled*. Scrambled signals like HBO, The Disney Channel and Pay-Per-View still require a Jerrold Tocom descrambler/converter box.

Also, some "cable ready" TVs and VCRs don't have the capacity to receive all cable channels. Look for 180-channel tuners, rather than 110 or 125-channel tuners. Otherwise, you may not be able to receive some current or future cable channels.

**New Call-In Programs**

Outer Banks Cablevision subscribers can now participate in North Carolina's OPEN public affairs programs via satellite Tuesdays & Thursdays between 8 and 10 p.m. In north Dare County, OPEN Programs are shown on Channel 20. On Hatteras Island, OPEN shows are on Channel 10. (Hatteras Island cable viewers wishing to watch NBC programs during this time may tune to WITN Cable 7.) OPEN programs connect citizens with public officials and government services via live call-in programs.

Jerry's Kids Say "Thanks!"

This past summer's Cable Cares campaign for the Muscular Dystrophy Association raised \$5315. That's 44% more than the 1990 campaign, and represents 1% of all money pledged during the WAVY-TV (Norfolk) Jerry Lewis Labor Day Telethon! Thanks to all who donated! We hope you're enjoying your new services!

Baseball In November?

ESPN (Cable 30) will cover the Major League Baseball expansion draft live on November 17 from New York City. MLB is adding 2 new teams for the '92 season, in Denver & Miami. The draft will run from 2 to 7 p.m. and 7:30 to 9 p.m.

Wide Screen Classics

American Movie Classics (cable 43) continues to deliver classic movies as they were meant to be seen... uncut, commercial-free and uncolored. Now you can enjoy many movies in their original wide-screen or Cinemascope format, and not miss any details that are normally missed when shown on TV. You can identify these movies by the appearance of black bands at the top and bottom of your TV screen. This technique, called "letterboxing" lets

viewers see all the action originally intended by the director. Letterboxed movies are best viewed on a large-screen TV because the details are smaller, even though you can see more of them. These movies, including *Guys and Dolls*, *Spartacus*, and *The Sugarland Express*, will be shown in both letterboxed and normal TV versions at different times. Look for Roger Ebert of "Siskel & Ebert" explaining how letterboxing will improve your enjoyment of these American Movie Classics.

Wide Screen II

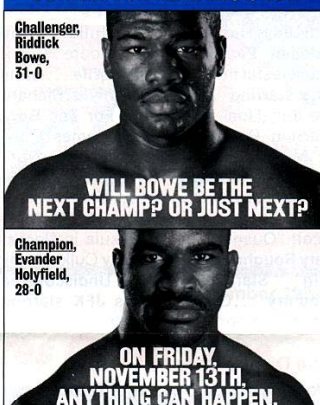

RCA and its sister ProScan brand plan to introduce wide screen TV receivers in the U.S. shortly, according to the Associated Press. New wide-screen receivers, already available in Europe, will feature a 34-inch screen with a width to height ratio of 16:9 (16 measurement units across by 9 down). These new sets will also handle images sent for conventional televisions, which use a more square 4:3 ratio. Other manufacturers are also expected to jump into the fray with new wide screen sets, but don't expect any \$200 deals any time soon.

Hockey Returns To ESPN After 4 Year Absence

ESPN (cable 30) will be carrying at least 25 regular season NHL games this season, plus up to 37 playoff games, including the Stanley Cup Finals. Most games will be seen Friday nights. Also, look for Washington Capitals home games on HTS (cable 40).

Bruce Unplugged

Bruce Springsteen is scheduled to make a rare television appearance on **MTV Unplugged** on Wednesday, November 11 at 10 p.m. **MTV Unplugged** is the only television show that features today's biggest rock names performing acoustically, without amplifiers or electronic embellishment.
