Dear DI Construction:

**CONGRATULATIONS VERIZON WIRELESS CUSTOMER!**

You may have heard that GTE Wireless is now Verizon Wireless, the nation's largest wireless provider.

Verizon Wireless is committed to offer you simple, affordable wireless service with the most advanced digital network.

Digital service provides better voice quality and advanced options, such as Caller ID and other messaging services, that are simply not available on your current analog service.

We want to offer you a new Audiovox CDM130 dual-mode digital phone for only \$9.99. With this phone, you can enjoy our new DigitalChoice<sup>SM</sup> local rate plans that include more minutes than ever, **giving you our best combination of network quality and overall value.** In addition to free Caller ID, most DigitalChoice<sup>SM</sup> plans include FREE long distance from your local coverage area to anywhere in the 50 states.

**Or...**

For just \$49.99, you can own the Nokia 5185i tri-mode digital phone and enjoy the benefits of our new SingleRate<sup>SM</sup> Southeast plans. SingleRate<sup>SM</sup> Southeast allows you to use your minutes across a **large eleven-state coverage area without roaming charges and with FREE long distance** to all 50 states across the U.S. for as low as \$25 a month.

Both of these digital phone offers are available with a one-year service agreement extension. In addition to a new wireless phone, you will enjoy many advanced DIGITAL features:

- Better call clarity. Digital service virtually eliminates static and interference when in a digital service area.
- Extended battery life as compared to analog phone battery life.
- New voice and data products available only with digital service, such as the optional Mobile Web<sup>SM</sup>, the way to receive important information on your digital phone.
- Built in paging and text messaging capabilities. You may never need a pager again!
- Better security. Verizon Wireless uses state-of-the-art CDMA (Code Division Multiple Access) digital technology to provide the highest security possible.

To begin enjoying digital service and your new specially priced digital wireless phone, please call us toll-free at 877-888-7380 today or bring this letter to any of the Verizon Wireless Communications Stores listed on the back of this letter.

We thank you for choosing Verizon Wireless - the company more people rely on every day for their wireless communications.

Sincerely,

Rick Gall - President, MidSouth Region

P.S. Ask about our "New Every Two" program that gives you the option of a free digital phone, up to \$100 value, every two years!

10/00

Right now,  
**Save on**  
Digital phones!
